Of the Four Quarters *of the year* 1696.

THe Winter Quarter begins when the Sun enters into *Capri.* *Decemb.* 11. 1695. at 8 a Clock in the Morning: This quarter may prove cold, with plenty of Snow & Rain, if we look back *Decemb.* 1694. we may see there was a Conjunction of the Sun & Saturn upon the 16 day which proved a very cold Month: I have observed that when there hath happened a Conjunction, Square or Oppositon of Saturn, & the Sun in the Winter quarter about that time it hath proved very cold weather; now it happens upon the 28 day of *Decemb.* about which time perhaps it may be very cold.

Of the Spring *Quarter* 1696.

The Spring Quarter begins when the Sun enters into Aries which this year is on the 9 of *March* 24 *min* past 8 in the Morn. This quarter may prove pretty dripping & cool till toward the middle of *April*, & afterwards more inclining to heat & thunder.

Of the Summer *Quarter.*

The Summer Quarter begins when the Sun enters Cancer, which happens this year, on *June* the 10. 12 *min* past 11 before noon: perhaps there may be some want of Rain in this quarter, if there be not a supply with thunder showers.

Of the Autumn *Quarter.*

The Autumn Quarter begins when the Sun enters Libra, which happens this year, on *September* the 12. 24. *min.* past 2 in the Morn. This quart. may prove something Windy & Wet, & it may be pretty cold, about the beginning of *October.*

Of the ECLIPSES *this year* 1696.

THere will be two Eclipses Visible to us here in *New-England* & they will be both of the Moon, *as followeth*, The first happens on the *6th.* of *May*, 8 *min.* past 7 in the evening: the Moon will rise Eclipsed, & will appear to be a great Eclipse if the air be clear, it happens in 27 degrees of Scorpio. The Second of the Moon, happens on the 29*th.* of *October* 53 *min.* past 11 at night, then totally Eclipsed & Visible to us, if the weather permit.

Concerning *Astrology* & *Meteorology*.

THE Reader may please to take notice that what I have Written & Published in my *Almanacks* either of *Astronomy*, *Astrology* or *Meteorology*; I have had Authors & Presidents for the same; and what hath been done by me in my *Almanacks* upon that account hath been by the desire of the *Printers*, who have had my *Copies*, and wherein I have endeavoured as concerning either *Astronomy*, *Astrology* or *Meteorology*, to do according to the several Rules to each of them prescribed by the Authors of these Arts; which Arts for many years have been & still are practised and allowed of in *England*: Perhaps my Friend *Lodowick* knows nothing of this, surely if he had, he would not have said so much against me as he has done, in his late *Almanack*; for he could not have said much more if I had been the sole & onely Author of *Star Prophecy* as he calls it. As for the *French* Kings Nativity, it was acted and put into my late *Almanack* by the *Printer* unknown to me, for which I was much displeased with him for so doing; for I would not that any thing should be put into my *Almanack*, that *I* did really apprehend or think might be displeasing to God, whatever it were to man, but I would gladly please man also.

As for the *Weather* in the Preceeding Pages, I have endeavoured to insert it according to the common Rules of *Meteorology*, which I have often found to fail, as to hit right; for the only Wise and All-knowing God that Created the Heavens and the Earth, and the Sun and Moon and Stars, may and many times doth so order it, that all Signs shall fail, as well upon other accounts, as this about the *Weather*, and therefore as I have said heretofore, I expect a Charitable censure concerning it.

FINIS.
